SUMMARY

A Front-end Developer with three years of experience building websites and web applications using Vue.js and Nuxt.js, I specialize in creating user-friendly interfaces and translating design concepts into functional web applications. Passionate about learning and improving my skills, I'm looking to collaborate with experienced professionals. Currently seeking remote opportunities to leverage my skills in a dynamic team environment.

Work Experience

Front-End Team Leader (full time)

Davinda January 2024 – Present

- Stay up-to-date with the latest frontend technologies and industry trends.
- Guided junior developers, helping them improve their skills and achieve their goals.
- Ensured projects were completed on time, within scope, and with high quality.
- Collaborated with team members to maintain a positive and productive work environment.
- Worked closely with project managers to meet business needs and deliver results.

Front-End Developer (full time)

Davinda March 2023 – December 2023

- Developed reusable Vue.js components for streamlined development.
- Worked closely with back-end developers to create and consume RESTful APIs, ensuring efficient data flow and enhancing the overall user experience.
- Collaborate with designers to translate designs into functional user interfaces.

Front-End Developer

FreeLancer June 2022 – Present

- Provided development services for more than four websites with dashboards to different clients.

Web Design (full time)

Hashtag9 March 2021 – May 2022

- Develop and maintain user-facing features using HTML, CSS, and JavaScript.
- Ensure the technical feasibility of UI/UX designs.
- Work closely with designers to translate ui/frame into responsive, interactive features.

Freelancer Projects

I have worked on numerous projects, and the following are a selection of them:

Levant: [link](#)

- description: Levant is a project designed to show lamp products and their categories in a user-friendly way. It provides an easy-to-use interface for users to explore different types of lamps and their categories.
- technologies used: Nuxt.JS, Pinia, Flipbook Vue.

LensGo: [link](#)

- description: LensGo is designed to accommodate services in everything related to photography in the Emirates. This application has many features so that the users can get these services using the website.
- technologies used: Nuxt.JS, Pinia, Google Maps, Stripe.

Form Builder: [link](#)

- description: Form Builder is a platform for quickly creating customizable forms and surveys, similar to Google Forms. It offers various question types, an easy-to-use interface, and tools for sharing and analyzing responses
- technologies used: Vue3 Easy Data Table, i18n, Vue3 Signature Pad, Grid Stack.

Kimo Bot: [link](#)

- description: Kimo Bot offers an engaging game with a three-reel slot machine and exciting missions to earn coins. Players can spin the reels for rewards and complete tasks to collect in-game currency.
- technologies used: Telegram Web App.

Education

Tishreen University: Bachelor in Informatics Engineering. (March 2020)

- GPA: 80%

Honours and Awards

- Basic Concepts in Special Education- Anty rural women development.
- Attending Certificate in Societal Entanglement- Anty rural women development.
- Certificate of Attendance (Web Design)- Idea Foundation, Orjwan Consulting.
- ICDL- Union Foundation.
